# DID YOU KNOW

## How the Date of Easter Is Determined Each Year

We enter spring and approach one of the most important holy days in Christianity—Easter. It has probably one of the most unique ways of determining its date of any religious holiday and it's not always obvious when we'll be celebrating Easter each year.

*Easter is always on Sunday.*

In Christianity, Sunday is recognized as the Sabbath, or the holy day each week when religious services and sacred observances are typically held. Early Christians after the death of Jesus Christ began the tradition of celebrating Easter (which commemorates Christ's resurrection) on Sunday, a day when they traditionally worshipped. While the exact Sunday in which it was observed was inconsistent, Sunday observance of Easter became a standardized norm almost immediately.

*Easter Comes on the first Sunday after the first full moon after the spring equinox.*

Deciding which Sunday was often a point of debate so, in 325 A.D., the Council of Nicea determined to standardize it. Making Easter the first Sunday after the first full moon after the spring equinox was settled on as the determining factor. By the 8th Century A.D., this method had become almost universally accepted.

Easter follows a full moon, but is never on the same day as a full moon.

According to the Bible, Jesus' death and resurrection occurred at the time of the Jewish Passover, which was celebrated on the first full moon after the vernal (spring) equinox. Thus, tradition holds the commemoration of Christ's resurrection must happen *after* the first full moon, never on it.
